PROFESSIONAL SUMMARY

Computer Programming associate graduate with hands-on experience in technical engineering, full-stack project delivery, mobile product development, and hardware-software integration. Working knowledge of Java, Spring Boot, REST APIs, React, MySQL, Flutter/Dart, Git, and Postman. Uses AI-assisted development to accelerate complex implementations while taking ownership of requirements, feature planning, integration, debugging, test execution, documentation, and GitHub workflows. Seeking a junior software development, application support, QA/test, or technical integration role in a remote or hybrid working model.

TECHNICAL SKILLS

Programming: Java, JavaScript, SQL, Dart, Python, C#

Backend and APIs: Spring Boot, Spring Web, Spring Security, Spring Data JPA/Hibernate, REST APIs, JWT, Maven

Mobile and Frontend: Flutter, Riverpod, GoRouter, React, HTML, CSS

Data: MySQL/MariaDB, Drift, SharedPreferences, relational database design

Tools and Practices: Git/GitHub, Postman, debugging, unit/widget testing, technical documentation, Agile teamwork, AI-assisted coding and agent workflows

Concepts: OOP, MVC, layered architecture, Clean Architecture, role-based access control, API integration, local-first applications

PROFESSIONAL EXPERIENCE

Technical Engineer - LedAjans | Istanbul, Türkiye | Aug 2025 - Present

- Provide on-site and remote technical support for LED display systems, including system setup, controller configuration, software integration, testing, commissioning, and post-installation support.
- Diagnose hardware, software, network, configuration, and field-operation issues; translate customer problems into clear technical actions and coordinate resolution with clients and suppliers.
- Work with Huidu control systems and related LED display technologies, applying knowledge gained through in-person engineering training in China.
- Prepare stable configurations, validate deployed systems, and support users to reduce operational interruptions and improve system reliability.

Software Development Intern - JFORCE Information Technologies Inc. | Istanbul, Türkiye | Jul 2024 - Aug 2024

- Participated in an enterprise full-stack development internship using Java, Spring Boot, React, REST APIs, and relational database concepts.
- Worked on an HR management application covering employee, inventory, assignment, and personnel-record workflows; contributed to frontend-backend integration, testing, troubleshooting, and delivery.
- Collaborated within a development team, followed assigned modules end-to-end, and gained practical exposure to authentication, authorization, database design, and layered application structure.

PROFESSIONAL TRAINING

Huidu Engineering Training - Shenzhen Huidu Technology Co., Ltd. | China - In Person

- Completed hands-on engineering training focused on LED display control systems, controller and software configuration, hardware-software integration, diagnostics, troubleshooting, and field deployment practices.
- Strengthened practical knowledge of configuring, testing, and supporting Huidu-based LED display solutions in customer environments.

SELECTED PROJECTS

Bismillah - Islamic Companion Mobile Application | Flutter, Dart, Riverpod, GoRouter, Drift, SharedPreferences, Firebase | GitHub

Open-source public alpha | AI-assisted individual product development

- Planned and coordinated development of a local-first Islamic companion application, taking responsibility for product requirements, feature breakdown, integration, test validation, documentation, and Git/GitHub workflow.
- Delivered product areas for Today, Prayer, Quran, Learn, and Profile, together with a deterministic source-grounded assistant layer and Turkish, English, and Arabic content support.
- The application includes offline prayer-time calculation, prayer tracking, Quran reading, bookmarks, offline search, verse lookup, recitation audio with Android background playback, and source-referenced learning content.
- Worked with Clean Architecture, feature-first organization, Riverpod state management, GoRouter navigation, local persistence, unit/widget/architecture tests, and real-device Android validation.

SELECTED PROJECTS - CONTINUED

HR Management System | Java 17, Spring Boot, Spring Security, JPA, MySQL/MariaDB, React, Vite, Axios | [GitHub](#)

Full-stack project developed through internship and AI-assisted learning workflows

- Worked with a full-stack HR application covering employee management, company inventory, employee-inventory assignments, and personnel log records through REST-based CRUD flows.
- The project includes JWT authentication, BCrypt password hashing, ADMIN/HR/INVENTORY role-based authorization, protected React routes, and automatic JWT attachment through an Axios interceptor.
- Used a layered Controller-Service-Repository structure with DTOs, mappers, Spring Data JPA, centralized exception handling, and environment-based database and JWT configuration.
- Contributed to requirements, API and frontend integration, database setup, endpoint testing, troubleshooting, and project documentation.

Restaurant Reservation System | Java 17, Spring Boot 3, Spring Security, JPA, MySQL, React | [GitHub](#)

AI-assisted full-stack portfolio project

- Built and tested a restaurant reservation workflow with user registration/login, JWT-based access, user and admin roles, reservation management, menu management, and relational data persistence.
- Worked with REST API integration between Spring Boot and React, Spring Data JPA entities/repositories, MySQL configuration, and Postman-based endpoint validation.

Film Library | Spring Boot, React, MySQL, TMDB API | [GitHub](#)

Full-stack portfolio project

- Created a film discovery and personal-library application integrating external TMDB movie data with authentication and MySQL-backed collection management.

EDUCATION

Associate Degree - Computer Programming - Recep Tayyip Erdoğan University | Türkiye | 2024

GPA: 3.0 / 4.0

ADDITIONAL INFORMATION

Career Focus: Junior software development, application support, QA/test, and technical integration roles

Work Model: Remote or hybrid; based in Istanbul, Türkiye

Portfolio Approach: AI-assisted development with direct ownership of requirements, integration, validation, documentation, and delivery
